1. Construct an equilateral triangle with each side equal to 7 cm .
2. Construct an angle of $60^{\circ}$.
3. a Draw a line 8 cm long and mark the point A as shown.

| 5 cm | $\AA \quad 3 \mathrm{~cm}$ |
| :--- | :--- |

b Construct an angle of $90^{\circ}$ at A .
4. a Draw a line 10 cm long and mark the point B on the line as shown.

| $4 \mathrm{~cm} \quad B$ | 6 cm |
| :---: | :---: | :---: |

b Construct an angle of $45^{\circ}$ at B.
5. Construct a right-angled triangle ABC , where the angle $\mathrm{ABC}=90^{\circ}$, $B C=6 \mathrm{~cm}$ and angle $\mathrm{ACB}=60^{\circ}$. Measure the length of AB .
6. Construct this triangle with ruler and compasses only. Measure $x$.

7. Draw any line and any point A.

Construct the perpendicular from the point A to the line.
